

DIY Lava Lamp

You will need

- Vegetable oil
- Vinegar
- Food colouring
- A clear tall container, such as a jar, clear bottle or cup
- A cup
- A spoon
- Bicarbonate of soda

Instructions

1. Add a layer of bicarbonate of soda into the bottom of your chosen container.
2. Next add the oil. You need to fill the container until its two thirds full of oil. The bicarbonate of soda will stay on the bottom, do not try to mix it with the oil.
3. In a separate cup mix vinegar with some food colouring.
4. Now that everything is ready, you can add drops of the coloured vinegar to your big container using a teaspoon.
5. Add you add more and more drops of coloured vinegar the magic will begin and you can enjoy watching your homemade lava lamp.

For a glowing effect why not turn off the lights and use a torch to light up your container?
