

How to play French Cricket

You will need:

A tennis racket

A tennis ball.

A wide space

Instructions:

One person holds the tennis racket in front of their feet so it is guarding their legs.

The other people playing make a circle around the person and throw the tennis ball at their legs in an attempt to hit their legs to get them out.

The person holding the racket has to keep their feet still but use the racket to defend their legs. If they are hit with the ball from the knee to their feet, they have to swap places with the person who threw the ball.

Enjoy!
