

How to make a rainbow tree

Materials:

A4 paper

Card/ tissue paper

Glue

Scissors

Colouring crayons/ felt tips (5 colours)

Instructions:

1. First, draw the silhouette of a tree (see example or use your hand as a template).
2. After that, shade in the silhouette with a dark colour (to make it realistic make it brown).
3. Then, cut out the silhouette (with a responsible adult) and stick on to the A4 paper, using glue.
4. Once you have stuck the tree onto your paper, choose 5 colours, that you will use to create a rainbow effect.
5. Then, take one colour and create the first 'wave' of your rainbow.
6. Repeat this step 4/5 times with a different colour.
7. You have a completed rainbow tree!
8. To make it 3D, you can add pieces of coloured card/ tissue paper.

N.B - If you want to use the silhouette as a template, please see page 2. Also, you can use paint if you wish!
