

How to draw a 3D hand!

1. Place your hand on a sheet of paper. Draw around your hand and wrist.
2. Using a ruler draw straight lines across the page (but not over the hand!)
3. Join the straight lines by drawing a curved line over your hand and wrist area.
4. Colour the stripes to make it look bright and colourful.
5. Get a black pen and go over the outline of your hand to make it stand out!

Here is an example for you:
