

## How to make a Spy decoder

1. Print off your spy decoder sheet.
2. Cut out the circles.
3. Use a split pin to attach the three together.
4. Turn the circles so that the 'A' on the outer edge matches the 'M' on the inner edge.
5. Try to crack my coded message! Match the letter on my sheet to the inner circle and see which letter is above it.

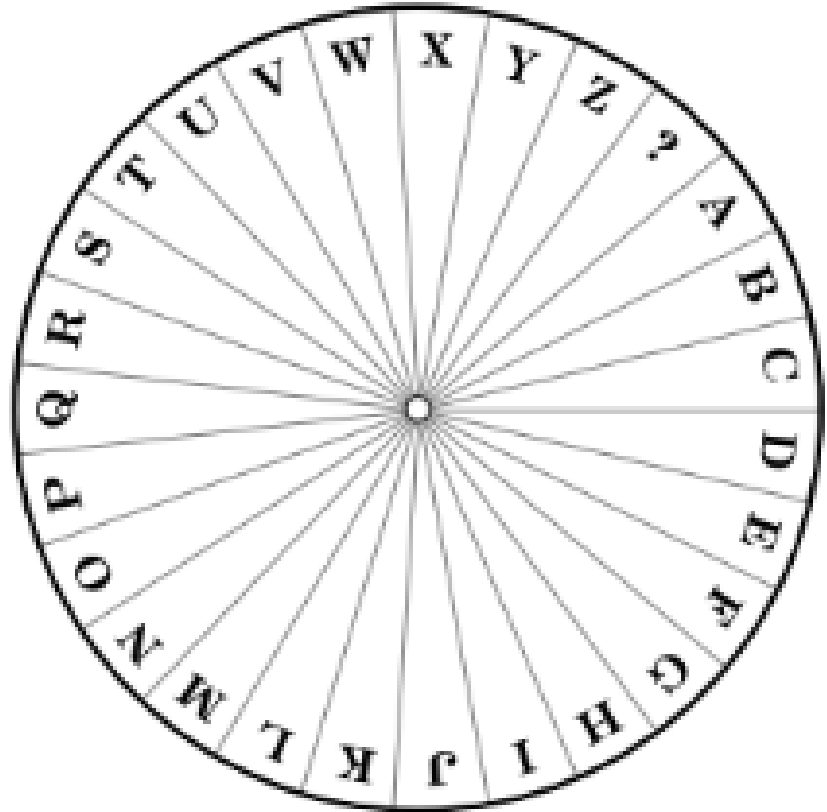

**NB:** See page 2 for the templates!
