

Self portrait

All you need to paint your self-portrait is:

- A mirror
 - A pencil
 - Paint (or you could use crayons if you don't have any paint)
 - A piece of paper
1. Look really carefully at your features in the mirror.
 2. Carefully sketch your face and features onto your piece of paper. Try to fill most of the piece of paper, people want to see your lovely face 😊
 3. Carefully look at the colour of your skin. You may need to mix some colours together to find the correct shade.
 4. Once you have painted your skin, you can begin to paint your features (eyes, lips, hair, freckles etc)
 5. Allow to dry.

Here are some examples:
