

Science Writing Task - Day 3 and 4

Look back at the animals and the habitats that you looked at yesterday.

Choose one of the animals and create a poster all about the animal and their habitat?

Try to include as much information as you can. It would be great if you could make it bright, colourful and eye-catching. Make sure your writing is clear and neat.

You might choose to use felt pens, paint or crayons. You might want to complete it on the computer and use images from the internet. You might want to create a collage. Try and be as creative as you can.

Please send Mrs Hade a photograph when you have completed your poster.

Remember to include:

A picture of the animal which is named and labelled.

A picture of the habitat which is named and labelled.

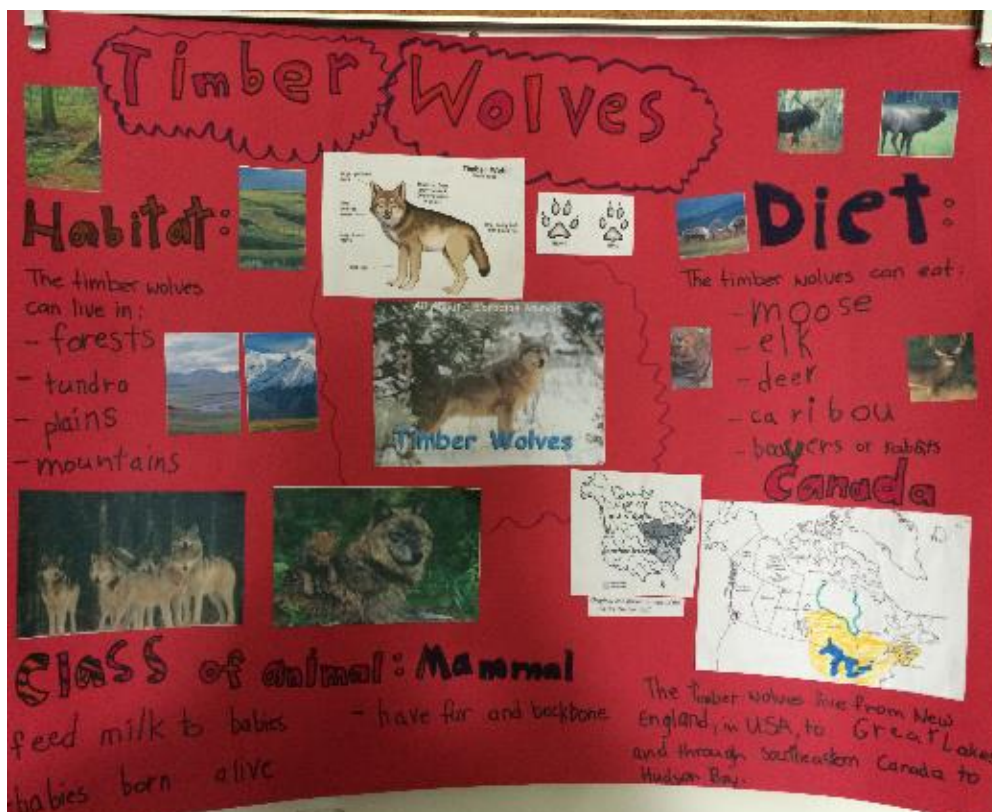

Where in the habitat does the animal live? Does its home have a specific name?

What does the animal eat and drink? Where does it get this food and drink from?

What preys on the animal? How does it protect itself from the predator? Does it have camouflage or any specific features?

Is this animal a predator? What animals does it prey on?

Any other interesting facts.

Your poster might look a little bit like this.
