

## Weaving rainbow fish

### Supplies Needed:

- Rainbow colored paper
- Googly eye (or make one out of paper)
- White or black card stock paper
- Scissors/glue

Start by cutting out the outline of the fish (see other page). Then cut strips of the coloured paper (using the long side).

Cut out the shape of a fish with card stock paper and fold it in half.

Use a scissors and cut slits close together not going too close to the bottom and mouth.

Weave the coloured pieces of paper through and trim the top and bottom to look like fish fins.

Add the extra scraps around the body and add yellow ones on the tail. So cute!
