

3D Flower Picture

1. Draw a vase onto your card. Make sure it is quite big, to fit lots of flowers in.
2. Collect some flowers and leaves from outside to put in your vase. Try to get ones with longer stems, to slot in the vase.
3. Decide where on the vase you would like your flowers to go.
4. Use Blu-tac, on the underneath of your card, and a pencil to poke holes in your card.
5. Slide the stems through the holes.
6. Secure them with some tape on the back of your picture so that they are at the height you would like.
